Ref: Model 173503 module under FCC ID: Z4D173503

To whom it may concern,

Per 47 CFR 15.212(a)(1):

- i. ***The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly;***

The module does not have its own shielding.

- ii. ***The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal;***

The module contains buffered modulation / data inputs.

- iii. ***The module must contain power supply regulation on the module;***

The module contains its own power supply regulation.

- iv. ***The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b);***

The module contains a permanently attached antenna.

- v. ***The module must demonstrate compliance in a stand-alone configuration;***

The module was not tested as a stand-alone for power line conducted emissions and radiated emissions. It was tested as a stand-alone for RF conducted emissions.

- vi. ***The module must be labeled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labeling requirements);***

The module is labeled with its own permanently affixed label.

- vii. ***The module must comply with all specific rules applicable to the transmitter including all the conditions provided in the integration instructions by the grantee;***

The module meets all applicable rules and conditions.

- viii. ***The module must comply with RF exposure requirements.***

The module meets applicable RF exposure requirements.

Per 47 CFR 15.212(b):

In reference to §15.212(b) limited modular approvals, the modular transmitter was evaluated in the specific configuration in its host device. The modular transmitter is installed in its host device in this same configuration at the factory, and is not user accessible or configurable. This establishes full control and maintains full compliance of the end product.

Sincerely,
